

Blue Glue National Online Induction Portal (NOIP)

No Set Up Fees

Safety is a primary concern to all businesses and Inductions are a necessary component of any Safety system.

Don't let inductions become a costly exercise to your business, with the **Blue Glue National Online Induction Portal** you can have all of your employees and contractors arrive onsite pre-inducted.

NOIP offers organisations a total solution to deliver a fully customised, content rich online induction experience with the ability to include multi-media in a web delivered product to employees and subcontractors alike.

Blue Glue NOIP minimises the time required for a site specific "on location" induction by ensuring inductees are prepared, prequalified and registered prior to coming on site.

Web delivery of induction material allows Safety managers in the field to concentrate on site specific issues and spend less time conducting inductions and more time concentrating of real life safety issues on site.

Blue Glue will customise the NOIP to include any required material and ensure the information delivered is clear and consistent.

- Inductions are conducted on an invitation only basis
- Each induction has a pass/fail benchmark set by you
- Controls in place to ensure that inductees understand the content
- Ensures the authorised inductee is the person actually completing the induction
- A certificate is issued so that authentication is confirmed on site.

NOIP is the latest addition to a suite of world's best practice safety products from Blue Glue. Available as a standalone product or as an added module to Blue Glue's National Safety System (NSS),
